Why partnering with OKNOPLAST is a game-changer. 36

01

THE OKNOPLAST DIFFERENCE

Who we are

Since 1994, we've been perfecting European craftsmanship to bring uncompromising quality straight to the American market. This collection isn't just about design concepts—it's a gallery of real-world spaces, fully realized.

Explore spaces that challenge standard dimensions and see our products in action. Discover how our bespoke windows and doors merge breathtaking design with proven, real-world performance.

3500

DEALER NETWORKS

2.3M

UNIT WINDOWS PER YEAR

32

OVER 30 YEARS OF EXPERIENCE

UNMATCHED SCALE & HERITAGE

For over 30 years, we've shaped what premium windows and doors can be. We produce 2.3 million units a year across five European factories, pairing world-class craftsmanship with proven reliability.

GAME-CHANGING INNOVATION

Combining high-performance **PAVA Impact** windows with **effiAIR micro-ventilation** and expansive **HORIZON** and **COMPACT** sliding doors as part of over 60 proprietary solutions engineered for modern architecture.

CERTIFIED AMERICAN PERFORMANCE

Engineered in Europe, certified for America. NFRC-rated, PHIUS-certified for Passive House builds, and HVHZ-approved for Florida's hurricane zones. Thirty years of building to the toughest specs on the market.

A STRATEGIC ALLY FOR PROFESSIONALS

We're more than a manufacturer —we're a partner you can build a business on. Fast quotes, reliable logistics, and a direct line to people who actually know the product.

THE CHALLENGE

Rising atop **Boston's tallest hill,** this fast-tracked multifamily development demanded **zero margin for error.**
Strict Massachusetts energy codes required Passive House-level thermal performance, while the aggressive construction schedule left **no room for supply chain delays.**

THE SOLUTION

We continuously push architectural boundaries with **over 60 proprietary solutions** – led by our signature **PIXEL** and **PAVA** systems. Their unmatched thermal performance, airtight seal, and soundproofing elevate your builds beyond standard American windows.

CAITLIN
FITZGERALD

In working with Laurel Windows and OKNOPLAST, we had a tight project schedule.

We knew that we needed to meet a duration of eight weeks or less to get these windows on site and installed on time. We received those windows within six weeks.

FOR THE PARTNER

A masterclass in collaboration

**Every project has people behind it.
They know their market.
We know our windows.**

Our dealers show up, measure, run the order and the install. One number, from the first measurement to the last adjustment. They know what passes inspection in their state and what holds up to their winters. The client will never see our plant. They'll see them.

We bring the rest: made to order product, technical support, service after the sale, and the tools to grow a business. Some of our dealers have been with us for years, because the arrangement pays off on both sides.

**This isn't a supplier and a buyer.
It's shared work.**

03

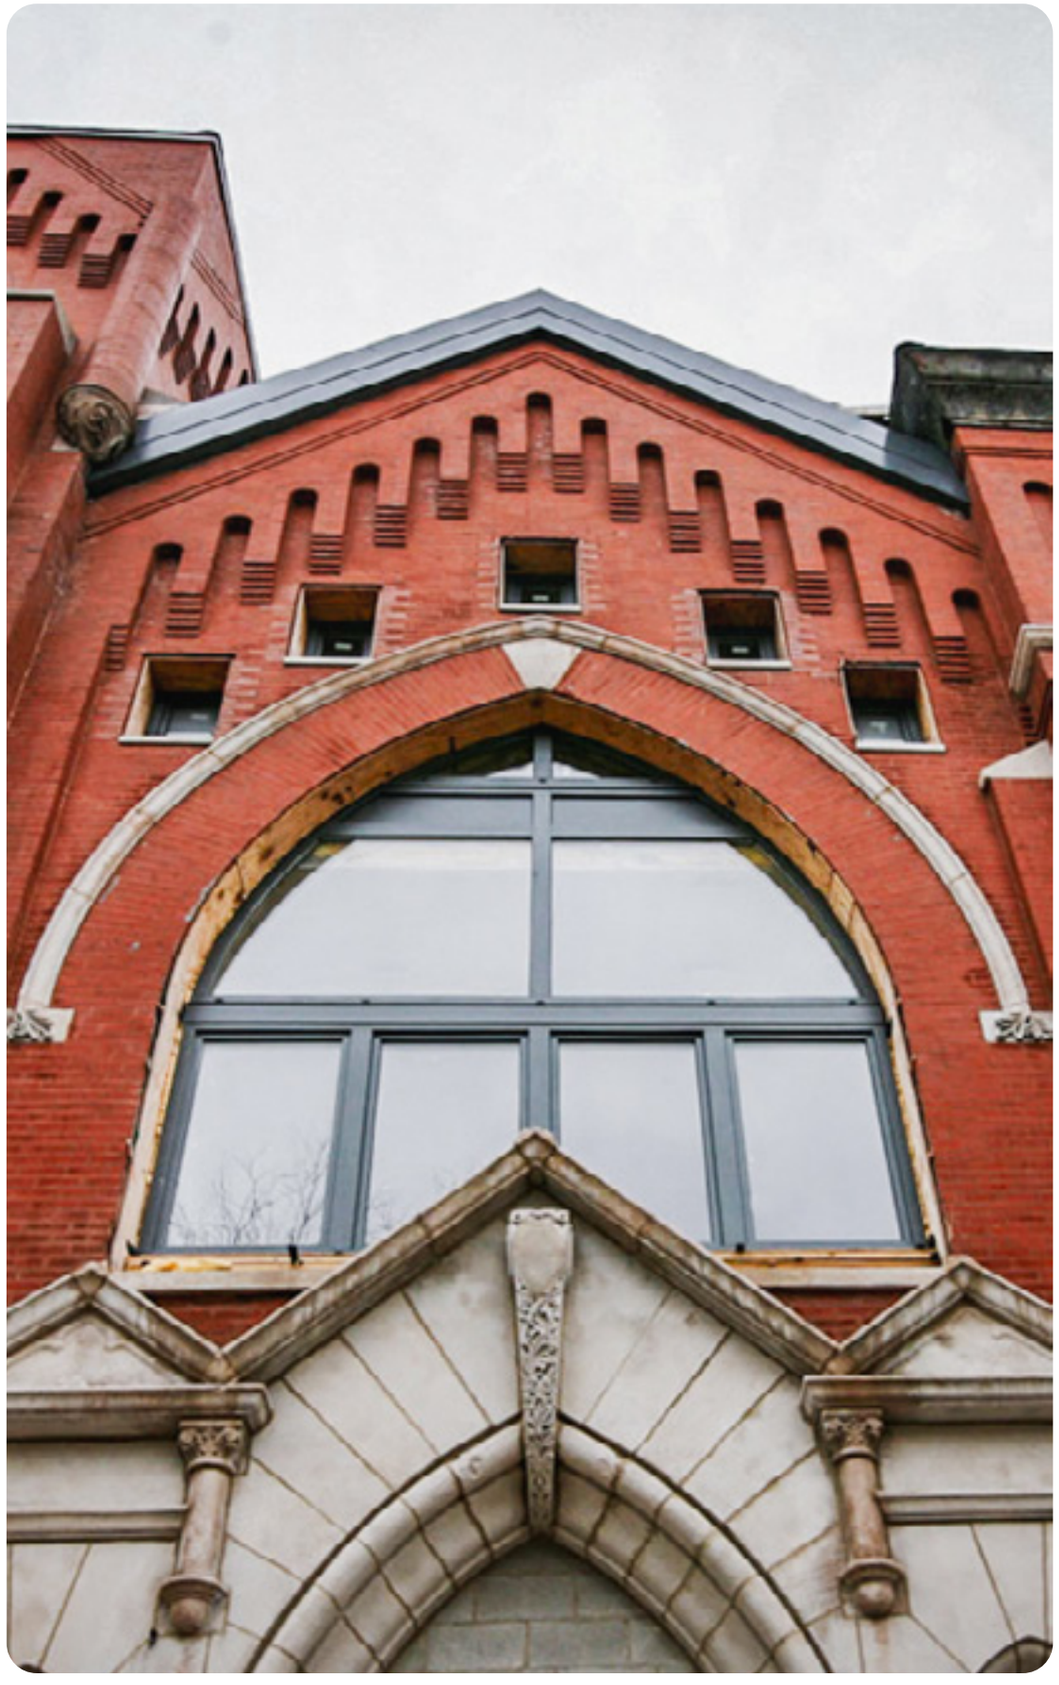
ARCHITECTURAL GEOMETRY

Design without limits

Whether you're building new
or restoring something historic,
our custom shapes, sizes, and finishes
meet whatever the design calls for.
You bring the vision; we engineer
the performance.

Chicago, IL

Historic church conversion



The Ukrainian Village project in Chicago turns a historic church into modern residences. PIXEL's minimalist frame preserves the monumental arched shapes of the original windows while delivering strong thermal and acoustic performance. Expansive glazing fills the interiors with natural light.

Pipersville, PA

Unlimited design potential

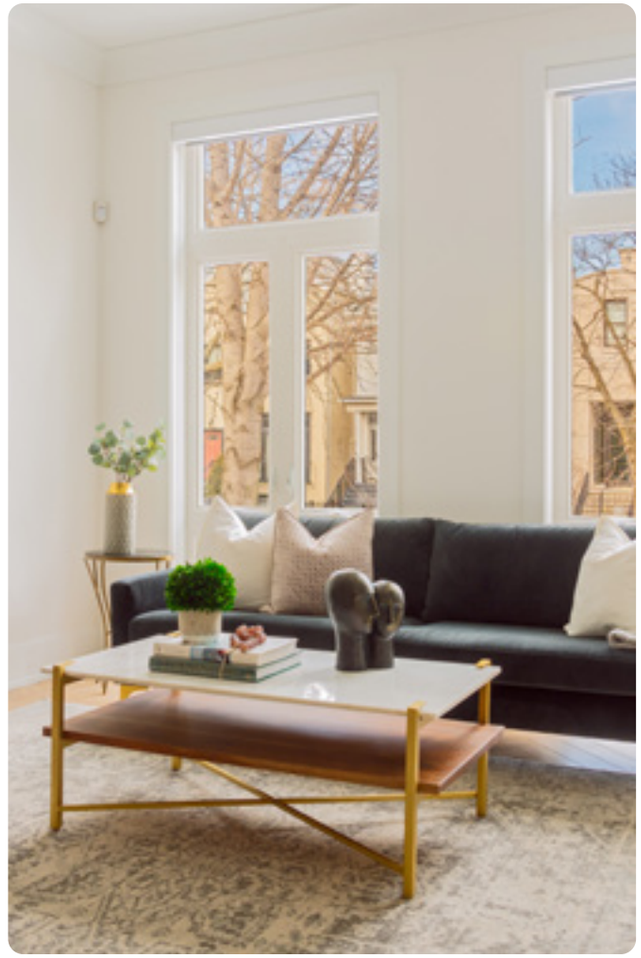
This custom single-family home pairs natural stone and warm wood with slim-profile uPVC PIXEL double-glazed windows. Aluminum nailing fins and mosquito screens round out the package, and the result is a house that stays tight, efficient, and comfortable through every season.

Expansive glazing, including COMPACT and HORIZON patio doors, opens the floor plan straight out to the yard. Big panels, easy operation, and no energy penalty for all that glass.

Chicago, IL

Wellington Ave

Some homes ask you to choose between old and new. This one doesn't. At 1235 W Wellington Ave, hand-laid masonry meets slim black OKNOPLAST frames: timeless outside, thoroughly modern in how they live.



Big glass, all day light. Rooms open into each other and hold onto the sun from morning through evening, bright and easy the whole way through.

From the living areas to the bedrooms, every window was placed to pull the outside in without giving up an ounce of comfort. The frames read as part of the woodwork – trim, casing, and hardware speaking one language – so what you notice is the room, not the product.

Chicago, IL

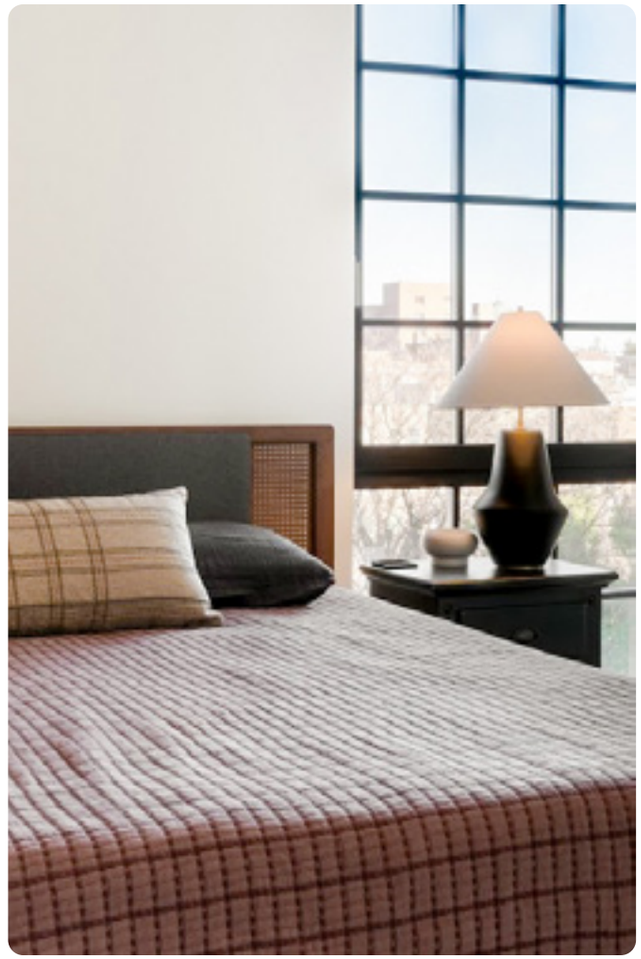
Lake Charles

A brick residence in Chicago’s Lake Charles, fitted with PIXEL windows from OKNOPLAST. Slim frames, expansive glazing, and daylight in every room – with the efficiency and comfort to match.

Baltimore, MD

Service Center

A modern multi-family development in Baltimore, built out with more than 500 PIXEL double-glazed units in Black Jet Matt. The industrial edge is the point - and it’s built to hold up.



PVC nailing fin installation, 1” SDL grilles, and STC 32 acoustics. The windows look the part and quiet the room.

U-Factor 0.28, SHGC 0.28.
The large-format grids pull in daylight and give the interiors their loft character.

04

THE PARTNER ADVANTAGE

Discover why partnering with OKNOPLAST is a game-changer.

01

SUPPORT AT EVERY STEP

Customer and technical support dedicated to your success, inquiry to post-installation.

02

QUICK QUOTATION & ADVICE

Accurate quotes within 48 hours. Cost-effective. On schedule.

03

LIMITED COMPETITION

Exclusive partnership offerings, rapid ROI, market leadership.

04

PERSONALIZATION

Bespoke designs into reality with specialized products meeting client needs.

05

RAPID PRODUCTION

8–10 weeks delivery. Streamlined process. Quality and speed.

06

EFFICIENT SHIPPING

Reliable logistics, on-time delivery to project destination.

07

TECHNICAL ADVISORY

Expert support on product selection and installation.

08

TRAINING & GUIDELINES

Comprehensive training. Clear installation guidelines.

09

POST-SALES SERVICE

Robust support extending beyond the sale. Long product lifecycle.

Three paths.
One partnership.

ARCHITECTS

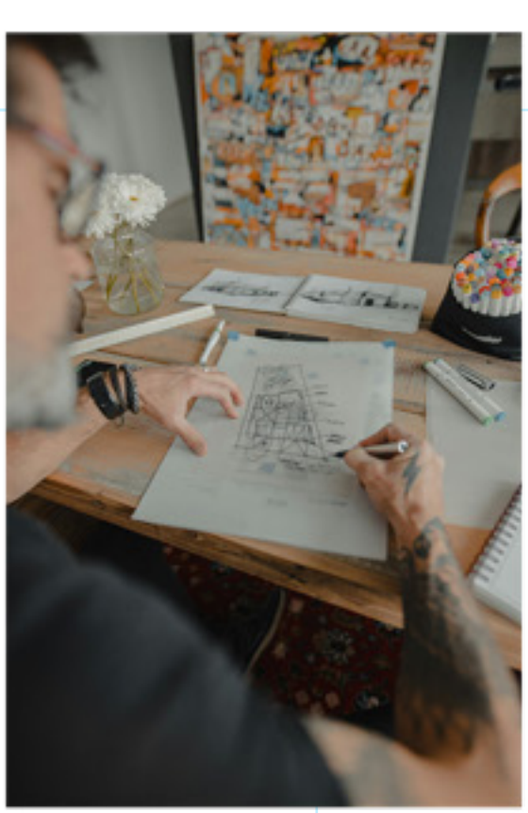
BIM files, 3D models, detailed product specifications, project case studies.

GENERAL CONTRACTORS

Quick installs. Code compliance. Long-term durability. Itemized quotes and on-call technical support.

DEALERS

European craftsmanship for your market. Product training. Showroom support. Jobsite backup.



BECOME A PARTNER

A long-term partner

Discover why architects choose OKNOPLAST for high-performance residential builds. Hear it directly from Steve Baczek, AIA, and see his journey with OKNOPLAST – from spec to install, from one project to many.
